

**ENGLEWOOD HEALTH**, one of New Jersey's leading hospitals and healthcare networks, delivers nationally recognized inpatient and outpatient care through its hospital and network of physician practices, urgent care centers, and imaging centers.

Englewood Hospital, founded in 1890, consistently earns high marks for clinical excellence and patient safety. It is recognized as a 2022-23 Best Regional Hospital by US News & World Report, holds the Leapfrog Hospital Safety Grade 'A' (spring 2022), and was named a Leapfrog Top Teaching Hospital (2022). Englewood Hospital is nationally recognized for nursing excellence, earning a fifth consecutive designation by the Magnet Recognition Program in 2021.

The Englewood Health Physician Network—a coordinated network of more than 600 office-based and hospital-based providers—offers primary care, specialty care, and urgent care at more than 140 locations in five counties across northern New Jersey.

Areas of clinical excellence offered by the health system include cardiac surgery and cardiac care, cancer care, orthopedic surgery, primary care, spine surgery, vascular surgery, and women's health, as well as bloodless medicine and surgery and minimally invasive robotic surgery. The hospital offers a vascular surgery fellowship, residency programs in dentistry, internal medicine, nursing, pharmacy, and podiatry, and training programs in radiography, emergency medical services, and other disciplines.

The hospital's state-of-the-art imaging centers across the region enhance access to diagnostic imaging, breast imaging, and cardiac imaging. A single electronic health record system offers full and seamless integration of patient information from the practices in the network and the hospital and imaging sites to support the patient experience and continuity of care.

Englewood Health's focus on population and community health encompasses out-reach to underserved populations to enhance individual and public health, prevent disease, support lifelong wellness, reduce the burden of mental health challenges and substance use disorders, and meet the cultural, social, and holistic needs of specific populations.

Through its hospital, physician network, and community health and wellness programs, Englewood Health delivers a healthcare experience that puts patients at the center.

## FACTS AND FIGURES 2021

### Team Members

Employees . . . . .	3,900+
Physicians and others on medical staff . . . . .	1,200+
